

**PURPOSE**

To guide sub surface tool back into the bottom of the tubing string.

**DESCRIPTION**

Very similar to a tubing collar, but having a beveled ID on the downward facing end, and a threaded box to thread onto the bottom of the tubing string.

**OPERATION**

Placed on the bottom of a tubing string, the Re-Entry guide will aid in guiding the wireline toolstring back into the tubing string when it is necessary to travel outside of the tubing and into the casing .
