

**PURPOSE**

To retain large pieces of debris during bailing operations.

**ASSEMBLY PARTS**

- 1. Barrel
- 2. Basket
- 3. Shoe

**OPERATION**

Assemble Junk catcher shoe and install on Hydrostatic Bailer, hoist into lubricator. Lower into wellbore to desired depth and jar down on debris to fire the Hydrostatic Bailer. Remove toolstring wellbore and inspect contents of the Junk Catcher Shoe barrel, any large debris should be trapped between the basket and the ball check of the bailer.

**PRECAUTIONS**

Inspect basket after every use as damage may occur.
