

**PURPOSE**

Hydrostatic bailer is a service tool used at the time when the substance which is to be bailed cannot be removed using pump bailer. It takes place when metallic particles and other debris become lodged on the top of the dogs of lock mandrel.

**ASSEMBLY PARTS**

- |                     |                    |
|---------------------|--------------------|
| 1. Fishneck         | 6. Piston Plug     |
| 2. Upper Barrel Sub | 7. Plunger         |
| 3. Equalizing Dart  | 8. Plunger Housing |
| 4. Barrel           | 9. Ball Trap       |
| 5. Lower Barrel Sub | 10. Shoe           |

**OPERATION**

Attach the Hydrostatic Bailer to the tool string and lower into the wellbore to the desired depth. Jar down on debris or obstruction to shear the shear pin and fire the bailer, remove from wellbore and inspect contents.

**PRECAUTIONS**

Running a Jar up pulling tool above the bailer may prevent the toolstring from becoming stuck in the wellbore if the bailer becomes lodged in debris downhole.
