

PURPOSE

Used as a one way check valve when there is a desire to retain pressure from below the valve.

ASSEMBLY PARTS

- 1. Body
- 2. Dart
- 3. Rubber Element
- 4. Element Retainer
- 5. Spring
- 6. Dart Retainer

APPLICATION

Used in conjunction with any number of lock mandrels, the F Float Valve may be landed in a variety of profiles to provide well control while still leaving the ability to pump or inject from above.

The F Float Valve comes in a variety of sizes and is compatible with existing Float Valves on the market.

When ordering please specify part name and size. Call us Toll Free: 1-800-438-0061
