

PURPOSE

Brace Tool Inc. manufactures an extensive line of drill pipe profile subs, these are available with any number of profiles and thread sizes depending on the application desired.

Used primarily as a backup, or contingency, (but not limited to) if snubbing operations are required due to a failure in existing floats, a blanking plug and / or circulating plug may be used easily and quickly.

Available with a wide variety of profiles and sizes, these provide versatility and ease of use as they utilize existing slickline plugging equipment and tools that are readily available.

Please contact Brace Tool Inc. for more information or with any questions you may have.
