

PURPOSE

The Baker style CF Profile Nipple is a selective type nipple that may be placed anywhere in the tubing string. The CF is a selective type profile nipple which means it be ran in conjunction with other CF nipples of the same size, as the plugging equipment can pass through one and be set in another.

The CF Profile Nipple typically comes with EUE box x pin thread connections, but is not limited to this, special or premium connections are available upon request as well as a wide range of materials for adverse well conditions
