

PURPOSE

Designed to be set in a sliding door to separate / isolate possible leaks through the sliding side door.

Also may be used for isolating the wellbore and producing through a sliding side door via ports that may be placed in the isolation sleeve.

ASSEMBLY PARTS

1. Sleeve
2. Packing Sub
3. Backup Ring - Female
4. Backup Ring - Male
5. End Cap

OPERATION

Attach the Separation / Isolation sleeve to the desired lock mandrel and lower into wellbore.

Jar the lower packing stack through the upper seal bore of the desired sliding sleeve and into the second, this will allow the lock mandrel to locate in the locking profile, set the lock mandrel and remove tool string from wellbore.

PRECAUTIONS

Care should be taken to know and identify the type of Sliding Side Door that the Separation / Isolation Sleeve is to be landed in, as the centre to centre dimension on the Sliding Side Door is critical for proper function of the Separation / Isolation Sleeve.

Baker Style:

Nominal Size		2.00"	2.50"
Assembly Number		1003SS200A0	1003SS250A0
Item	Part Name		
1	Sleeve	1002SS20001	1003SS25001
2	Packing Sub	0903B20001**	0903B25001
3	Backup Ring - Female	0903BUR18701**	0903BUR23101
4	Backup Ring - Male	0903BUR18702**	0903BUR23102
5	Endcap	1003SS20002	1003SS25002
6	Sleeve Ported	1003SS20003	1003SS25003
Top Thread Connection		1.406" - 14 UN	1.812" - 14 UN
Max O.D.		1.865"	2.307"
